Project update – Proposed permanent electronic message sign on the Princes Highway, Arncliffe

The NSW Government is funding this project as part of its $246 million Pinch Point Program, which aims to reduce traffic delays, manage congestion and improve travel times on Sydney’s major roads, particularly during weekday peak periods.

The project includes installing a new sign on Princes Highway opposite Spring Street, to provide northbound road users with up-to-date information on traffic conditions and planned and unplanned incidents and events.

Roads and Maritime Services sought feedback from the community and stakeholders on the proposed new sign in December 2015. We thank everyone who took the time to consider the proposal and provide comments.

We received feedback from six people and organisations. Two people supported the proposal and four people provided feedback on the need to increase road capacity and reduce traffic congestion and the need for the sign.

Following a review of the feedback, we have decided to proceed with the proposal without change.

What happens next?

The work to complete the project will include:

- Excavating and putting in foundations
- Installing the electronic sign
- Trenching and installing power and telecommunications cables
- Testing the sign.

We have included a map to help explain the project’s location.

The work will be completed in three stages. The first stage will take six shifts to complete between Monday 2 May and Monday 30 May, excluding weekends, weather permitting. Our working hours will be from 9pm to 5am. We will also be working during the day from 7am to 5pm, excluding weekends.

We will keep you informed as the project progresses.

How will the work affect you?

There will be some noise associated with this work. We will make every effort to minimise its impact by carrying out the noisiest work during the day and before 11pm.
Traffic changes

There will be some temporary traffic changes to ensure the work zone is safe.

Lane closures will be in place and may affect travel times. Please keep to speed limits and follow the direction of traffic controllers and signs.

For the latest traffic updates, you can call 132 701, visit livetraffic.com or download the Live Traffic NSW App.
